

STaR – Student Academic Resources

The Macomb Academy of Arts and Sciences is offering a new program beginning Fall 2008 for students that will benefit from extra help after regular school hours.

The STaR program is designed to give students extra academic support so that they will be able to continue on a road of success at MA²S.

On select Mondays through Thursdays the Academy will be open for extra hours after school. See posted calendar in each teacher's room for specific times and teacher availability. Monthly STaR calendar will also be posted on our website.

During STaR hours students can get help with their Academy courses, use the computer lab, or meet with other students to form student directed study groups.

The STaR program is partially funded by the Alliance for Academic Excellence Grant
